

Solutions For Healthcare

Register your medical devices: worldwide, safe and valid

We are thrilled to work with you to implement the requirements for both commercial and regulatory use

About us

Manafeth is the regional representative of atrify. We provide globally enabled, Certified Cloud Technology Platform to manage Master Data Management, Product Information Management and Digital Assets Management, ensuring accurate, correct and easy exchange of data among trading partners using a data pool based on GS1 GDSN and eCommerce services.

atrify - First GDSN Certified Data Pool

atrify is the product content platform that enables more than 20,000 users from trade and industry in over 50 countries to exchange accurate and reliable content with their partners and consumers.

Our UDI Solution

UDI Manager

The UDI Manager is a slim, modern and user-friendly web-based application for manually capturing or uploading your UDI data via Excel.

UDI Solution M2M (API)

With the automatic and high-performance UDI Solution M2M, you can send your validated UDI data quickly from your internal system to competent authorities or trading partners.

Send Your Data to
Health Authorities, Hospitals, Clinics, GPO's and Distributors
Compliant, Fast & Easy with atrify UDI Solution

RECEIVE DATA FROM MEDICAL DEVICE MANUFACTURERS

We provide hospitals, clinics, GPOs, wholesalers and distributors who want to receive data from healthcare manufacturers with one of the most comprehensive solutions to subscribe, receive, review and forward product content via GDSN.

Receive Healthcare Data the Way You Want

Convenient User Interface, M2M connection, Secured data quality, Greater efficiency

Your Advantages

Validations to ensure data quality and adherence to standards to ensure error-free data transfer within the GDSN

Product content is available worldwide thanks to GDSN
